7. Click "Finish" after the installation process is completed

8. Relaunch your MT4 platform

Autochartist for Mac

1. **Download** this file

2. **Open** the terminal (cmd + space and type in "Terminal")

3. **Copy & paste** the following command into the terminal and hit "Enter"

   If you are using OS X 10.9 or later:
   "defaults write com.apple.finder AppleShowAllFiles -boolean true; killall Finder"

   If you are using OS X 10.8 or earlier:
   "defaults write com.apple.finder AppleShowAllFiles TRUE; killall Finder"

4. At this point, hidden files and folders should become visible

5. **Open** "Macintosh HD" ↪ "Users" ↪ "Your username" ↪ "Library"
   (right-click and select open in new tab) ↪ "Application Support"
   ↪ "com.AxioryGlobal.MT4_123456" ↪ "drive_c""Program Files"
   ↪ "Axiory MetaTrader 4" ↪ "MQL4"

6. **Copy & paste** your downloaded file **"MQL4"** with the indicator to folder (replace the MQL4 folder with the new downloaded one)

7. **Restart** the MT4 and it should work now

8. You can find Autochartist under **"Expert Advisors"** in the navigator window

At this point you need to enable web requests by following these steps:

1. Click on "Tools" in the menu item

2. Click "Options"

3. Click "Expert Advisors" tab

4. Autochartist should be now ready for you to use in your MT4 platform
